

SEAN VINCENT MAFNAS

Air Force Officer Candidate | B.S. Computer Science

Sun Valley, California

LinkedIn | GitHub

PROFESSIONAL PROFILE

Computer Science graduate and experienced professional with a background spanning team leadership, logistics, technical troubleshooting, heavy-equipment operations, customer service, and information technology. Demonstrated ability to lead personnel, operate effectively in safety-critical and time-sensitive environments, solve complex problems, and remain accountable for personnel, equipment, and operational requirements.

Previously led a 20-person team while providing logistics and maintenance support for a U.S. Army operation in Guam. Earned a Bachelor of Science in Computer Science, graduating Summa Cum Laude and earning President's List distinction. Seeking to apply technical aptitude, leadership experience, adaptability, and a commitment to service as a commissioned officer in the United States Air Force.

LEADERSHIP & PROFESSIONAL EXPERIENCE

Commercial Tire Technician II

Cemak Trucking, Inc. | Los Angeles, California

February 2026 – Present

- Independently diagnosed equipment issues through systematic inspections and troubleshooting, identifying underlying problems and determining appropriate corrective actions.
- Performed repairs and component replacements on complex heavy equipment while maintaining strict adherence to safety procedures and operational requirements.
- Managed inventory, service requests, work documentation, and supply requirements using RTA fleet management systems.
- Responded to high-pressure and time-sensitive equipment issues requiring sound judgment, prioritization, and rapid problem-solving to minimize operational downtime.
- Maintained accountability for work quality, equipment readiness, documentation, and safe execution with limited supervision.

Heavy Equipment Tire Technician

Hawaiian Rock Products | Guam

October 2021 – January 2025

- Diagnosed and resolved mechanical and tire-related problems affecting heavy-duty construction and industrial equipment.
- Maintained operational readiness of heavy equipment through preventative inspections, repairs, and strict adherence to established safety procedures.
- Managed inventory and service-order requirements to ensure necessary materials and equipment were available for ongoing operations.
- Worked independently in physically demanding and time-sensitive environments where equipment downtime directly affected operations.
- Applied critical thinking and troubleshooting skills to identify problems and implement effective solutions during urgent situations.

Logistics Lead

CrossFit Hita / U.S. Army Contractor | Guam

May 2021 – August 2021

- Led and coordinated a **20-person team** providing logistical and maintenance support for a temporary U.S. Army base operation.
- Directed daily personnel assignments and coordinated time-sensitive operational requirements to support mission needs.
- Managed resource allocation, equipment tracking, logistical requirements, and maintenance schedules while maintaining accountability across assigned assets.
- Coordinated with team members and military personnel to adapt to changing operational priorities and resolve logistical challenges.
- Reinforced teamwork, accountability, and safety while ensuring personnel and resources were positioned to accomplish operational requirements.

Courier

Instacart | Los Angeles, California

January 2015 – March 2020

- Maintained a **98% customer satisfaction rating** while operating independently in a fast-paced, customer-focused environment.
- Managed competing priorities and time-sensitive assignments while maintaining consistent communication with customers.
- Adapted quickly to changing circumstances and resolved customer issues independently while maintaining service standards.

EDUCATION

Bachelor of Science — Computer Science

University of Maryland Global Campus

- Graduated **Summa Cum Laude**
- Earned **President's List** distinction
- Developed **Cash Control**, a personal finance management application, as a capstone project
- Relevant coursework included Software Engineering, Data Structures, Database Systems, Algorithms, and Web Development

TECHNICAL KNOWLEDGE

Operating Systems: Windows 10/11, macOS, Linux (Ubuntu), Windows Server exposure

Networking: TCP/IP, DNS, DHCP, VPN, LAN/WAN, network connectivity troubleshooting, basic routing and switching

Programming & Development: JavaScript, Python, Java, C++, Git, GitHub, VS Code

Databases & Platforms: MongoDB, MySQL, H2, Firebase, Supabase

Enterprise & Productivity: Microsoft Office 365, virtual machines, Active Directory and Group Policy exposure

Methodologies: Agile, Scrum, root-cause analysis, systematic troubleshooting

LEADERSHIP & PROFESSIONAL STRENGTHS

Team Leadership • Accountability • Technical Problem-Solving • Critical Thinking • Adaptability • Resource Management • Operational Planning • Safety & Risk Awareness • Communication • Independent Decision-Making • Customer Service • Continuous Learning

COMMISSIONING OBJECTIVE

Pursuing a commission through United States Air Force Officer Training School with an interest in technical and mission-focused career fields, including Cyberspace Operations. Seeking the opportunity to combine a Computer Science education, operational experience, and demonstrated leadership with service as an Air Force officer.

Long-term goals include developing as a leader, taking responsibility for Airmen and mission accomplishment, continuing to expand technical and professional expertise, and building a career of meaningful service in the United States Air Force.
